### PROJECT BASIC DATA

#### Project/Program Description:

Spanish Cooperation has supported the establishment and consolidation of the SIPA's Financial Intelligence Department since the beginning of its activities at the end of 2004. This has been done mostly through the supply of material, furniture and equipment, a Technical Assistance for the elaboration of a Manual of Procedures for the FID and support to the development of the necessary software. Now that the FID has been successfully established, Spanish Cooperation works with its management in order to strengthen and improve the efficiency of this institution, which will be done through additional equipping and a development of an application for the analysis of information received.
